XSEDES

X-CAPTURE CLASSIC PHOTO BOOTH

Step in. Strike a pose. Take it home.

Live filters, your event frame and a 4 × 6 in print from the tray, with a copy on every guest's phone.

FILTERS · FRAMES · PRINT · QR

The booth cabinet: touchscreen, camera, lamp and printer in one piece.

The photo booth guests know. Finished like a print studio.

The X-CAPTURE Classic Photo Booth takes the photo, places it in your event frame, prints it on the spot and sends it to the guest's phone.

A single shot in the event frame.

WHAT GUESTS DO

Tap start, pick a look, smile for the countdown. One clear action per screen.

WHAT THEY SEE

Ten live filters in the viewfinder, then the photo inside your frame before it prints.

WHAT THEY TAKE HOME

A 4 × 6 in print from the side tray, and a copy on their phone by QR code.

WHAT YOU GET

Every photo filed by event, ready to export, and your brand on every print.

10	4 × 6 in	1–4	QR
LIVE FILTERS	PRINTS	SHOTS PER PRINT	COPY TO EVERY PHONE

XSEDES

The booth cabinet, with the lamp, touchscreen and camera.

Built like furniture. Runs like a kiosk.

A freestanding wooden cabinet on tripod legs. It looks at home in a hotel lobby, a gala or an exhibition hall, and it does the whole job by itself.

TOUCHSCREEN

At eye level, with the camera set just above it.

LAMP

A warm lamp crowns the cabinet and draws people across the room.

PRINT TRAY

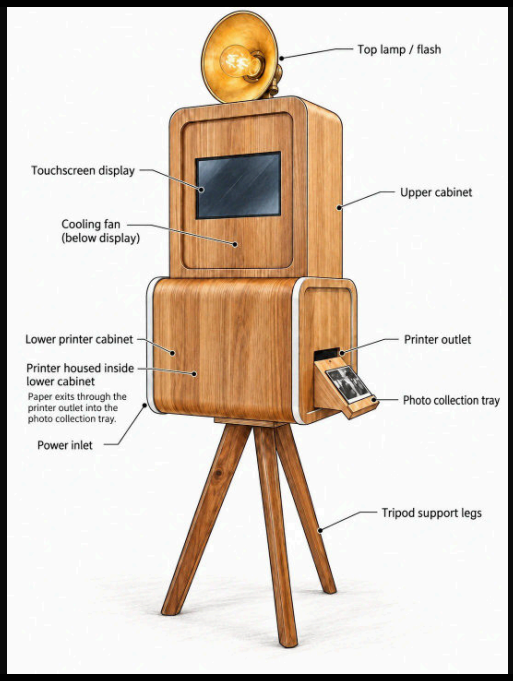

Prints arrive in a side tray, ready to pick up.

START SCREEN

One start screen for both experiences: classic photo or AI portrait.

Everything in one cabinet.

Screen, camera, lamp and printer live in two stacked wooden cabinets on tripod legs, fed by one power inlet.

The cabinet, labelled.

01 **Lamp and flash**
Above the upper cabinet.

02 **Touchscreen**
In the upper cabinet, with a cooling fan below it.

03 **Printer**
Housed inside the lower cabinet.

04 **Print outlet**
Paper exits into the collection tray on the side.

05 **Power**
One inlet on the cabinet.

06 **Legs**
Wooden tripod supports.

Six moments. One great print.

Every screen has one obvious action and a way back. Guests never see a staff message or a technical error.

01

Start

Tap to start, over your own event background.

02

Pose

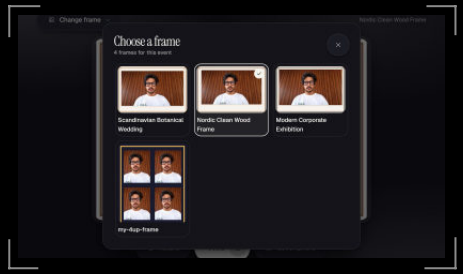

Pick a filter and see it live before the shot, with mirror, grid lines and brightness.

03

Countdown

A clear count and a shutter sound. Strips take each shot in turn.

04

Frame

Singles, strips and grids, all from one frame file.

05

Preview

The photo appears in the event frame. Retake if needed.

06

Print and share

The print drops into the tray and a QR code puts a copy on the guest's phone.

Ten looks. Any frame.

The same colour recipe runs in the viewfinder and on the saved photo, so the print matches what the guest saw.

Single
EVENT FRAME

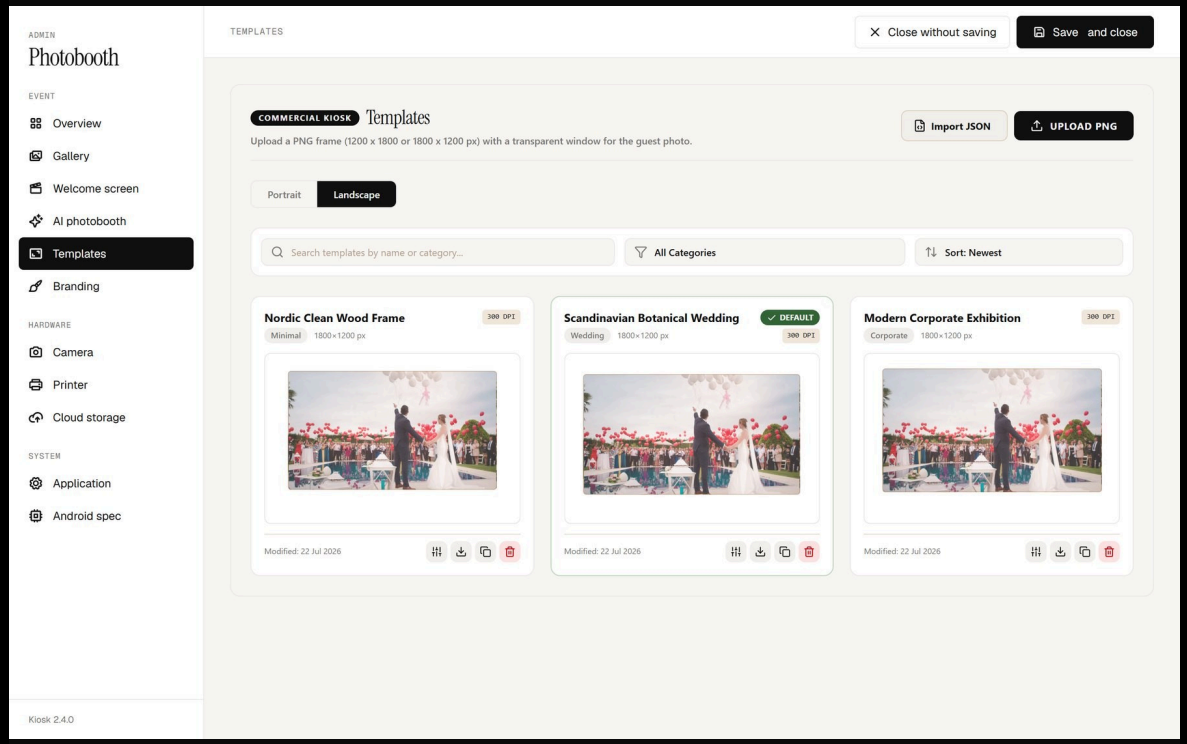

Single
EVENT FRAME

Single
EVENT FRAME

Four-up grid
EVENT FRAME

The admin area's frame templates screen.

Set up once. Run all night.

Everything staff need before doors open and while the booth runs, without touching code.

FRAME TEMPLATES

Upload a PNG frame. The booth finds the photo windows; position, size, rotation and scale can be fine-tuned.

PRINTING

Send prints to a PC on the same Wi-Fi. Set copies per session and test the connection.

EVENT GALLERY

Every photo filed by event. Export the whole set in one go.

BEFORE THE EVENT

Frame chosen and approved, printer ready, cloud upload online, default PIN changed.

Three taps for the guest. Five stages underneath.

Every photo passes through five stages, each built to fail gracefully in a busy venue.

The guest screen during a session.

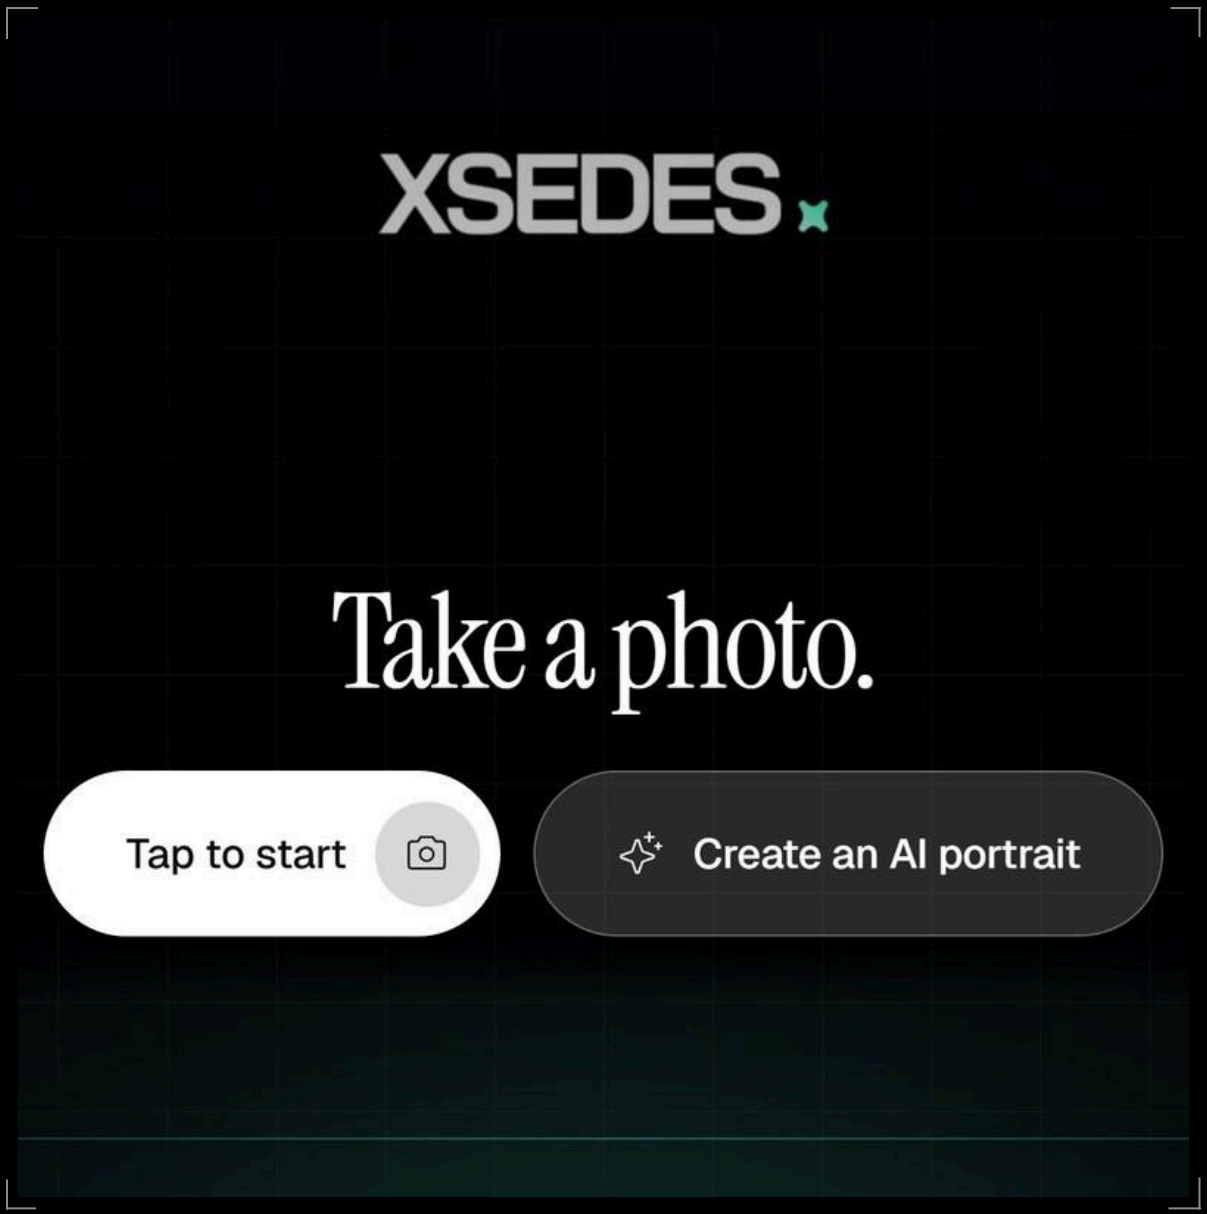

01 **Camera**
1920 × 1080 capture with a live preview, countdown and shutter sound.

02 **Look**
A colour filter, the same in the viewfinder and on the saved photo.

03 **Compose**
The photo is placed into the frame's windows at print resolution.

04 **Print**
A print helper on a PC sends the 4 × 6 in print to the printer.

05 **Share**
A download page per photo in cloud storage, reached by QR code.

A branded welcome screen, set up in the admin area.

Built around your brand.

Every guest-facing surface takes the event's identity. Staff set it up in the admin area before doors open. No code, no rebuild.

WELCOME SCREEN

Your background, logo and call to action on the first screen guests see.

EVENT FRAME

A frame or masthead placed inside every photo, print and share.

STYLES AND LOOKS

The filters and AI styles that suit the event, chosen per event.

REGISTRATION

Optional lead capture before the photo: name, email, phone and company.

The booth cabinet in a hotel setting.

One booth. Every kind of room.

Classic prints for the crowd, in a cabinet that suits the room.

GALAS AND HOTEL EVENTS

A piece of furniture in the lobby that also prints.

WEDDINGS AND RECEPTIONS

Prints for guests to keep, and a full gallery for the hosts.

CORPORATE AND CAMPUS EVENTS

Your frame on every print and every phone.

EXHIBITIONS AND LAUNCHES

A reason to stop at the stand, with the brand in every photo.

The side print tray.

What the system does today.

Taken from the product. Display size and footprint are confirmed per event.
